

Types of storage for mobility scooters:

MOBILITY SCOOTER STORAGE

The standard mobility scooter storage (LSB175-RG) is equipped with 2 gas springs to assist in opening the movable roof section. There is an option to equip the Shed with an electric roof opening (LSB175-RGE), for people who have little arm strength.

The basic Shed has the following features:

- * reinforced with a ground brace
- * Foldable roof section provided with 2 gas springs
- * Fully ventilating
- * Doors and lid lockable with a cylinder lock
- * Top and door lock finished with aluminum
- * rainproof
- * Battery shelf
- * maintenance free but easy to stain
- * delivered in panels
- * easy assembly

In the case of a shed with an electric roof opening and closing, the assembly can

In view of the guarantee, assembly can only be done by LUTRA.
